Our nation’s digital infrastructure is constantly being probed, tested and assaulted by new and evolving threats. As these threats continue to grow and multiply, the demand has also grown for accredited professionals in the fields of cyber operations and critical infrastructure protection who understand the current strategies and policies necessary to identify and mitigate these threats.

The George Washington University is a designated Federal Center for Academic Excellence in Information Assurance Research by the National Security Agency and the Department of Homeland Security. Courses are offered at GW’s Virginia Science & Technology Campus located in Ashburn, VA. Up to 70% of the world’s Internet traffic passes through Loudoun County on a daily basis.

**CYBER WARFARE CERTIFICATION:**

Inspired by the work of the U.S. Cyber Command, this intensive five-day course examines strategy and effects-based operations (EBO), as well as crisis and contingency planning in the cyber domain. Students will study the integration of cyberspace and spectrum management operations, and will gain an understanding of cyber intelligence surveillance and reconnaissance (ISR), game theory, policy and strategy as they relate to cyber planning and critical infrastructure protection.

- Offered in Collaboration with Cyber Checkmate Consultants, LLC
- Bootcamp-style – earn your certification in only one week
- Earn three (3) undergraduate credits
- Lunch included
